EXPERIENCE

Mutual of Omaha, Omaha, NE (Remote — Chicago, IL) — *Full Stack Java Developer*

Jan 2025 – Present

Designed and implemented **end-to-end features** across Angular, Spring Boot, and PostgreSQL, ensuring consistent data flow, modular code structure, and maintainability.

Built backend REST APIs using **Spring Boot**, **Spring Data JPA**, and **Hibernate**, focusing on clean service layers, reusable components, and reliable business logic.

Developed Angular components, services, reactive forms, and routing configurations to deliver responsive UI modules for internal and customer-facing workflows.

Deployed applications on **AWS EC2** and stored static assets in **AWS S3**, applying cloud fundamentals such as stateless services, decoupling, and environment-based configuration.

Implemented event-driven backend tasks using **AWS Lambda** and **SQS**, enabling asynchronous processing and reducing load on synchronous API calls.

Built and maintained CI/CD pipelines using **Jenkins** and **GitHub Actions**, automating build, test, and deployment steps to improve release consistency and reduce manual effort.

Integrated the **OpenAI API** to automate a small internal workflow, reducing repetitive manual steps and improving team productivity.

Collaborated with QA, product, and engineering teams to clarify requirements, resolve blockers, and ensure smooth delivery across Agile sprints.

Conducted pull request reviews and wrote unit/integration tests using **JUnit** and **Mockito** to maintain code quality and prevent regressions.

SKILLS

Java (11/17), Spring Boot, REST APIs, microservices, JUnit/Mockito

Angular, TypeScript, JavaScript, HTML/CSS, reactive forms

PostgreSQL, MySQL, schema design, stored procedures, optimization

AWS (EC2, S3, Lambda, SQS), Kafka, Docker, Git, Jenkins, GitHub Actions

EDUCATION

DePaul University, Chicago, IL — *M.S. Information Systems & Project Management*

2022 – 2024

GITAM University, Hyderabad, India — *B.S. Computer Science*

2017 – 2020

Mutual of Omaha, Omaha, NE (Remote — Chicago, IL) —Full Stack Developer

Jan 2023 – Dec 2023

Built Angular modules including components, services, routing, and reactive forms for a customer-facing insurance portal used by thousands of users.

Developed Spring Boot REST APIs and integrated them with Angular frontend modules to deliver reliable UI-to-API communication.

Deployed application components on **AWS EC2/S3**, following cloud best practices such as environment separation, secure configuration, and logging.

Used **Apache Kafka** for asynchronous event-driven communication between backend services, improving decoupling and reliability of background workflows.

Participated in Agile ceremonies, collaborated with UI/UX designers, QA engineers, and product managers to refine requirements and deliver features iteratively.

Contributed to code reviews, documentation, and shared coding standards to maintain consistency across the engineering team.

MUFG Bank / PUB Bank, Hyderabad, India — Backend Java Developer

Feb 2020 – Aug 2022

Developed and maintained REST APIs using **Java 11** and **Spring Boot** to support internal banking workflows, ensuring reliability and compliance with internal standards.

Designed SQL queries, stored procedures, and database schemas using **PostgreSQL** and **MySQL**, optimizing queries for performance and accuracy.

Integrated **Apache Kafka** to enable asynchronous event processing between internal services, reducing dependency on synchronous communication.

Built basic UI pages using **HTML**, **CSS**, and **JavaScript** for internal tools used by operations teams.

Worked closely with QA and product teams to gather requirements, triage defects, and deliver tested features on schedule.

Participated in Agile ceremonies including sprint planning, daily standups, and retrospectives to support team delivery cadence.

PROJECTS

Project Name — *AI Document Intelligence Platform — Full Stack / Cloud / AI Project*

GitHub:

<https://github.com/Rajeshdevandla/ai-document-intelligence-platform>

Built an end-to-end AI-powered document processing platform using **Spring Boot**, **Python (FastAPI)**, **React**, and **AWS**.

Implemented microservices for document upload, OCR extraction, text processing, and analytics using **Kafka**, **SQS**, **Lambda**, and **Textract**.

Integrated **OpenAI API** and **Claude API** to extract structured insights from unstructured documents.

Designed event-driven workflows and automated pipelines using **Docker**, **GitHub Actions**, and **Terraform**.

Developed a React dashboard for document viewing, processing status, and analytics visualization.
